VITA Easyshade® V
Perfect shade determination, maximum reliability.
“Cost-effective determination and communication of tooth shades is only possible with digital technology – VITA Easyshade® V is the ideal tool.”

Dr. med. dent. Philipp Grohmann (dentist and dental technician)
VITA Easyshade® V
Highly precise shade determination. Reliable shade reproduction.

VITA Easyshade V is a digital shade measurement device for determining the tooth shade of natural teeth and veneered ceramic restorations precisely, quickly and reliably.

VITA Easyshade V supports dentists and dental technicians with everything from tooth shade determination and communication, to reproduction and checking the shade of the finished ceramic dental restoration, improving process reliability.

**VITA Easyshade V**
- **reliable, precisely determined tooth shade information** thanks to intelligent and objective measurement technology
- **shade determination within seconds to save time and reduce costs** thanks to measurement results at the touch of a button
- **reliable material selection and shade reproduction** thanks to exact and detailed tooth shade information
- **simple transmission of tooth shade and image information** to the laboratory using software or the app
VITA Easyshade® V
One device. Versatile range of applications.

VITA Easyshade V offers dental practices and laboratories efficient and reliable support with:
• precise tooth shade determination of natural teeth and veneered restorations
• optimum selection of suitable restoration materials
• professional planning and documentation of bleaching treatments
• quality testing of layered ceramic restorations with regard to a target tooth shade
• seamless communication between laboratory and dental practice

Product details
• compact, ergonomic spectrophotometer with intuitive touch display
• modern measurement technology to determine the base tooth shade and shades of individual tooth areas
• Output of results in VITA color standards, as well as bleached colors, according to the American Dental Association (ADA)
• Display of lab and LCh values
• Bluetooth interface for wireless communication with the corresponding software and app
**VITA mobileAssist.**
The simple way of communicating tooth shades.

Thanks to the convenient VITA mobileAssist app, transferring tooth shade information between the practice and the laboratory is easy and efficient. The data from VITA Easyshade V is wirelessly transmitted to the app via an internal Bluetooth interface and can be combined with a patient photo and sent through e-mail. All of the relevant tooth shade information and patient photos can be sent conveniently from a smartphone or tablet.

**VITA Assist.**
Professional tooth shade communication and documentation for the dental practice and laboratory.

The Windows based PC software, VITA Assist, professionally documents and manages dental findings, as well as tooth color information. VITA Assist allows integration of the VITA Easyshade V measurement results into digital patient photos and offers additional image editing tools, as well as a wide range of comment functions. The database allows for efficient patient case management and information exchange between practice and laboratory.
One device. Countless applications.

- Basic shade determination for the selection of materials for direct fillings
- Basic shade determination for the selection of prosthetic teeth
- Tooth shade determination for use in bleaching
- Shade determination for the selection of CAD/CAM materials
- Average tooth shade determination for multichromatic teeth
- Tooth-area shade determination for layered ceramic restorations
- Determination of the restoration shade during the fabrication of restorations
- Quality control regarding the target shade of finalized ceramic restorations
- Intraoral shade determination of existing ceramic restorations
- Communication via VITA Assist
- Communication via the VITA mobileAssist app
VITA systems.
Ideal solutions during processing

- For digital shade determination, use VITA Easyshade V and for visual shade determination, the VITA Linearguide 3D-MASTER or VITA classical A1–D4, for example.

- For CAD/CAM fabrication, VITA offers you highly esthetic feldspar ceramic, high-strength glass ceramic, innovative hybrid ceramic materials and zirconia — simply select the ideal material solution for your individual requirements.

- For feldspar, glass ceramics and zirconia, use VITA AKZENT Plus stains and the VITA VM 9 or VITA VM 11 veneering ceramics. Use VITA ENAMIC Stains for the hybrid ceramic and VITA VM LC flow for individualization.

- Glaze, stains, and/or dentine and crystallization firing are best carried out in the laboratory with the VITA VACUMAT 6000 M premium firing unit, and in practice with the VITA SMART.FIRE premium firing unit specially tailored to chairside restorations.

- It is recommended to use the VITA ZYRCOMAT 6100 MS for sinter firing.

- Note: When using a hybrid ceramic, firing must not be carried out.

- In the case of VITA feldspar ceramics, use polishing systems suitable for silicate ceramics (e. g., VITA Karat diamond polishing set).

- For VITA glass and hybrid ceramics, VITA SUPRINITY / VITA ENAMIC polishing sets should be used.

- VITA ADIVA LUTING SOLUTIONS are products for adhesive bonding of restorations made of feldspar, glass ceramic and hybrid ceramic, and are matched to VITA materials.

* Note "Optional process steps/firing": The feldspar and hybrid ceramic materials can be seated directly after milling and polishing. The following process steps mentioned above are optional for feldspar ceramic. The same steps are required for the hybrid ceramic, but with the hybrid ceramic, firing must not be carried out. When using zirconia, sinter firing is carried out prior to characterization/individualization.
With the unique VITA SYSTEM 3D-MASTER®, all natural tooth shades are systematically determined and perfectly reproduced.

**Please note:** Our products must be used in accordance with the instructions for use. We accept no liability for any damage resulting from incorrect handling or usage. The user is furthermore obliged to check the product before use with regard to its suitability for the intended area of applications. We cannot accept any liability if the product is used in conjunction with materials and equipment from other manufacturers that are not compatible or not authorized for use with our product and this results in damage. The VITA Modulbox is not necessarily a component of the product. Date of issue of this information: 04.19
