

Residual risks of denture teeth (such as VITA LINGOFORM, VITAPAN and VITA PHYSIODENS, VITA MFT and VITA VIONIC VIGO)

Possible complications and residual risks of denture teeth, which can occur generally and are not specific to VITA materials, are:

- Loosening of the tooth in the dentures and/or loss of the prosthesis, resulting in possible choking
- Irritation of the mucosa
- Intolerance and/or potential allergic reaction
- Breakage

These risks must be communicated to the patient by trained personnel (e.g., dental professionals).
