VITA DENTIST SOLUTIONS is the comprehensive system solution for dentists for (implant) prosthetic restorations. From shade determination and CAD/CAM fabrication to bonding, this system offers customized product solutions for all major treatment/processing steps. Perfectly matched products from a single source enable reliable and efficient practice application.
VITA – perfect match.

*) Note "Optional process steps": The feldspar and hybrid ceramic materials can be seated directly after the CAM process and polishing. When using the VITA ENAMIC hybrid ceramic, firing must not be carried out.
VITA shade determination –
proven solutions for precise
tooth shade determination and
reproduction, according to
internationally recognized standards.
VITA Easyshade® V

Highly precise shade determination. Reliable shade reproduction.

FACTS & FEATURES

What?
• VITA Easyshade V is a digital shade measurement device for determining the shade of natural dentition and ceramic restorations precisely, quickly and reliably.

Benefits?
• reliable, precisely determined tooth shade information thanks to intelligent and objective measurement technology
• shade determination within seconds to save time and reduce costs thanks to measurement results at the touch of a button
• reliable material selection and shade reproduction thanks to exact and detailed tooth shade information
• simple transmission of tooth shade/image information to the laboratory using software or the app

What for?
• precise tooth shade determination for reliable shade reproduction, shade control of restorations and documenting progress in bleaching

more product data
VITA Easyshade® V

▷ BASIC INFORMATION/SPECIFICATIONS

▷ Product description

VITA Easyshade V spectrophotometer

- compact spectrophotometer with advanced ergonomic design
- intuitive touch display for simple device control
- modern measurement technology to determine the base shade and shades of individual tooth areas
- results displayed in all VITA shade standards and in accordance with bleached index (according to ADA)
- bluetooth interface for transmission of tooth shade information to PC, tablet or smartphone

VITA Assist Tools for shade communication

- software and app solutions for digital communication of tooth shade and image information from the dental practice to the dental laboratory
PRODUCTS/ASSORTMENTS/COMPONENTS

VITA Easyshade V spectrophotometer
- Spectrophotometer incl. base unit

Accessories
- Power cord, infection control shield (2 x 18 pcs.), USB Bluetooth adapter

VITA Assist Tools
Software/App for shade communication
- VITA Assist software (CD-ROM), VITA mobileAssist App for Android and iOS
VITA SHADE GUIDES

Convenient, visual shade determination, according to global shade standards.

FACTS & FEATURES

What? • The original VITA shade guides are used for convenient, visual tooth shade determination
• Available for the VITA classical A1-D4, VITA SYSTEM 3D-MASTER and VITA Bleached-guide 3D-MASTER tooth shade systems

Benefits? • convenient, visual tooth shade determination
using compact shade guides with ceramic VITA shade samples
• quick visualization of the tooth shade
for the patient based on standardized shade samples
• efficient control of the shade fidelity of restorations
through visual shade comparison with the reference shade sample

What for? • VITA classical A1–D4, the traditional basic solution proven for decades, for shade determination in one step
• VITA Linearguide 3D-MASTER, the advanced, systematic premium solution for dental restorations with perfectly matched shades
• VITA Bleachedguide 3D-MASTER, for planning and monitoring bleaching treatments
### BASIC INFORMATION/SPECIFICATIONS

#### Product description

**VITA classical A1-D4 shade guide** *(basic solution)*
- Basic solution for shade determination in just one step
- 16 shade sample teeth made of ceramic, manufactured in Southern Germany
- Shade samples are arranged according to the hue
- Three VITA Bleached Shades samples are available as complementary products

**VITA Linearguide 3D-MASTER shade guide** *(premium solution)*
- Premium solution for systematic shade determination and communication for highly esthetic restorations
- 26 shade sample teeth made of ceramic, manufactured in Southern Germany
- Systematically arranged shade samples according to lightness, chroma and hue
- Includes three VITA Bleached Shades samples

**VITA Bleachedguide 3D-MASTER**
- Instrument for determining the level of lightness for bleaching treatment in just a single step
- 29 levels of lightness based on VITA SYSTEM 3D-MASTER®
- Realistic depiction of tooth bleaching
- Simple communication with the patient, thanks to a clear and transparent structure
VITA CAD/CAM materials – ideally matched and clinically proven tooth-colored materials for all single tooth indications.
VITA ENAMIC®

A new definition of load capacity*.

 › FACTS & FEATURES

What? • Unique hybrid ceramic with a dual ceramic-polymer network structure
  • Available as mono- and polychromatic types in up to three translucency levels (T, HT, ST)

Benefits? • fabricating durable restorations
  using a high-load capacity hybrid ceramic with absorption of masticatory forces
• non-/minimally invasive restorations,
  since the elastic hybrid ceramic enables reduced wall thickness
• fabricating accurate, precise and delicate structures
  using a hybrid material with integrated elasticity
• cost-effective reconstruction
  thanks to time-saving CAM fabrication and efficient finalization using polish,
  without any firing process

What for? • ideal solution for minimally invasive, delicate and implant-supported reconstructions

*) In addition to a high degree of elasticity, this innovative hybrid ceramic ensures outstanding load capacity after adhesive bonding.

more information: VITA ENAMIC Brochure 10445 (for dentists)
## VITA ENAMIC®

### BASIC INFORMATION/SPECIFICATIONS

#### Product description

**VITA ENAMIC (T, HT, ST)**
- monochromatic, tooth-colored hybrid ceramic blanks; available in the translucency levels T, HT and ST

**VITA ENAMIC multiColor**
- polychromatic, tooth-colored hybrid ceramic blanks with integrated shade gradient to reproduce the natural play of colors

**VITA ENAMIC IS**
- monochromatic, tooth-colored hybrid ceramic blanks with an integrated interface to an adhesive/titanium base

#### Recommended indications*

**VITA ENAMIC (T, HT, ST)**
- reconstructions with reduced wall thicknesses that preserve natural tooth structure
- posterior crowns that offer high load capacity in cases with limited space availability
- precise repair of small defects (e.g., indirect cervical fillings/delicate inlays)
- non-/minimally-invasive reconstruction of occlusal surfaces (table top)
- monolithic veneering structures for digital dual structure bridges

**VITA ENAMIC multiColor**
- esthetic crown restorations with vivid play of color/light
- delicate (non-prep) veneers for cosmetic reconstructions
- implant-supported crowns on individual titanium abutments
- implant-supported crowns on ceramic implants

**VITA ENAMIC IS**
- implant-supported abutment crowns and mesostructures on adhesive/titanium bases (e.g., TiBase; Dentsply, Sirona)

*) These are recommended indications; the entire range of single tooth restorations can normally be fabricated. For details, please refer to the respective working instructions of the products.

VITA ENAMIC polishing instruments
VITABLOCS® Mark II, TriLuxe forte, RealLife

Proven a million times over.

＞FACTS & FEATURES

What?
- Tooth-colored feldspar ceramic for unsurpassed integration of the shade, proven a million times over
- Available as monochromatic (Mark II) and polychromatic (TriLuxe forte/RealLife) types

Benefits?
- fabricating reliable restorations thanks to a durable material with very good clinical long-term reliability
- highly esthetic restorations thanks to a material with superior play of colors and light
- cost-effective reconstruction thanks to time-saving CAM fabrication and efficient polishing without any firing process

What for?
- ideal solution for esthetic reconstructions of minor defects and highly esthetic restorations in the visible region

more information: VITABLOCS Brochure 1454
**VITABLOCS® Mark II, TriLuxe forte, RealLife**

### BASIC INFORMATION/SPECIFICATIONS

#### Product description

**VITABLOCS Mark II**
- monochromatic, tooth-colored feldspar blanks with shades that match those of residual teeth

**VITABLOCS TriLuxe forte**
- polychromatic, tooth-colored feldspar blanks with integrated shade gradient to reproduce the natural play of colors

**VITABLOCS RealLife**
- VITABLOCS RealLife: polychromatic, tooth-colored feldspar blanks with integrated 3D layer structure to reproduce the natural shade gradient

#### Recommended indications*

**VITABLOCS Mark II**
- small, esthetic reconstructions (inlay, onlay, partial crown)

**VITABLOCS TriLuxe forte**
- highly esthetic reconstructions in the visible region

**VITABLOCS RealLife**
- highly esthetic anterior crowns with natural shade gradient

---

*These are recommended indications; the entire range of single tooth restorations can normally be fabricated. For details, please refer to the respective working instructions of the products.*

Bonding with VITA ADIVA LUTING SOLUTIONS
VITA SUPRINITY® PC

Glass ceramic. Revolutionized.

FACTS & FEATURES

What?
• Zirconia-reinforced, high-strength glass ceramic generation
• Available as monochromatic blanks in two translucency levels (T, HT)

Benefits?
• high reliability
  thanks to a zirconia-reinforced glass ceramic matrix
• precision-fit results
  thanks to material blanks with high edge stability
• simple processing
  thanks to good polishing characteristics and high firing stability
• brilliant play of shades/light
  thanks to integrated translucency, opalescence and fluorescence

What for?
• ideal solution for anterior and posterior crowns, superstructures on implants, as well as inlays, onlays and veneers
VITA SUPRINITY® PC

VITA CAD-Temp®

Ideal solutions for long-term temporary restorations.

FACTS & FEATURES

What?

• Proven composite made of highly cross-linked acrylate polymer with microfiller for the fabrication of long-term temporary restorations

Benefits?

• good long-term stability
  thanks to good surface stability and fracture strength (period of wear: up to three years)
• natural shade effect
  thanks to a material with good light optical properties
• cost-effective fabrication of temporaries
  thanks to time-saving CAD/CAM fabrication

What for?

• ideal solution for long-term temporary restorations (VITA CAD-Temp) and temporary implant-supported restorations (VITA CAD-Temp IS)
VITA CAD-Temp®

VITA stains – for natural reproduction of all shade nuances of natural teeth for restorations made of VITA materials.
VITA AKZENT® PLUS STAINS

Efficiently and reliably reproduce a lifelike appearance.

› FACTS & FEATURES

What? • Stains for characterization and glaze materials for glazing all dental ceramic restorations (feldspar, glass and zirconia ceramics)

Benefits? • brilliant, homogeneous restoration surfaces thanks to glaze materials made of particularly fine microstructure ceramic
• extremely simple shade modification thanks to chroma shades for systematic control of chromaticity

What for? • for characterizing/glazing all dental ceramic restorations
# VITA AKZENT® PLUS STAINS

## BASIC INFORMATION/SPECIFICATIONS

### Product description*

**VITA AKZENT PLUS EFFECT STAINS** (paste)
- masking stains for natural reproduction of surface effects (e.g., calcification)
- stains provide excellent masking properties

**VITA AKZENT PLUS BODY STAINS** (paste)
- translucent, finishing stains to modify the shade effect of the restoration

**VITA AKZENT PLUS CHROMA STAINS** (paste)
- finishing stains for systematic control of the chromaticity of the restoration

**VITA AKZENT PLUS GLAZE LT** (paste/spray)
- for homogeneous surfaces with a natural degree of gloss
- available as GLAZE LT, FLUOGLAZE LT (with integrated fluorescence)**

*) For use in practice, paste is the recommended formulation. However, VITA AKZENT PLUS is also available as a powder.

For more information visit www.vita-zahnfabrik.com

**) VITA AKZENT Plus FLUOGLAZE LT is only available as a spray.

VITA AKZENT® LC

Reliable reproduction of individual shade effects.

FACTS & FEATURES

What?
- Light-curing composite stains for characterizing all indirect restorations made of composite, polymer and hybrid ceramic
- Multifaceted effect shades, glazing chroma shades, glaze paste and accessories

Benefits?
- **reliable true-to-life reproduction** of shade facets of natural dentition, thanks to a wide range of brilliant effect stains
- **extremely simple shade modification** with a brush stroke, thanks to chroma shades for plannable, systematic control of chromaticity
- **efficient processing** thanks to shade effects with pinpoint precision or highly efficient shades applied across a large surface area with ideally matched viscosities

What for?
- for effect reproduction and shade correction of dental restorations made of hybrid ceramic, CAD/CAM composite, 3D printing acrylic polymer, veneering resin and denture teeth
- for internal characterization with the veneering technique
VITA AKZENT® LC

▷ BASIC INFORMATION/SPECIFICATIONS

▷ Product description

VITA AKZENT LC EFFECT STAINS
- 14 shades for natural, accurate effect reproduction

VITA AKZENT LC CHROMA STAINS
- four glazing chroma shades for systematic control of shade corrections

VITA AKZENT LC GLAZE
- glaze paste for lasting, brilliant surface sealing

*) For polymerization of VITA AKZENT LC, a light-curing device is required with light sources that emit rays in the wavelength range of < 430 nm!

- 6 x EFFECT STAINS (white, grey-blue, blue, orange, khaki, russet), 1 x GLAZE, accessories

VITA AKZENT® LC EXPERT KIT CLASSICAL
- 8 x EFFECT STAINS (cream, lemon, sun, pink, dark-red, purple, grey, black),
  4 x CHROMA STAINS classical, 1 x GLAZE, accessories

VITA AKZENT® LC EXPERT KIT 3D-MASTER
- 8 x EFFECT STAINS (cream, lemon, sun, pink, dark-red, purple, grey, black),
  4 x CHROMA STAINS 3D-MASTER, 1 x GLAZE, accessories
VITA firing unit –
for reliable firing of all common chairside materials, while providing simple and intuitive operation.
VITA SMART.FIRE

Efficient firing unit for chairside restorations.

FACTS & FEATURES

What? • VITA SMART.FIRE is a compact firing unit developed for dentists specifically for the crystallization, glaze, stain and corrective firing

Benefits? • quick use
  thanks to material selection and program start in a single step
• intuitive operation
  thanks to organized menu navigation with self-explanatory program symbols
• convenient use
  thanks to particularly compact device design
• reliable function
  through long-lasting firing technology

What for? • for crystallization, glaze, stain and correction firing of all common chairside materials
› BASIC INFORMATION/SPECIFICATIONS

› Product description

**VITA SMART.FIRE** furnace

- space-saving chairside firing unit for convenient use
- durable housing with sealed surfaces for easy cleaning
- integrated service drawer for readily available accessories, such as firing trays, firing pliers, etc.

**VITA vPad excellence** control unit

- pre-installed programs for all common chairside materials
- high-resolution 10-inch touch display for perfect operation and top image quality
- clearly arranged menu with self-explanatory symbols for quick program selection
- software-based assistance function for supported step-by-step firing
- control of up to four firing and sintering furnaces using a single control unit (VITA SWITCHBOX required)

**VITA SMART.FIRE** Accessories

- accessory set integrated in the firing unit for convenient firing
- includes firing trays, fibrous pad firing supports, platinum pins, firing pliers and cooling table

VITA processing tools – for high-gloss, homogeneous restoration surfaces, thanks to polishing instruments ideally matched with the specific materials.
VITA POLISHING TOOLS

Efficient two-stage polishing systems for an excellent degree of gloss.

FACTS & FEATURES

What?
• Polishing systems for reliable, efficient and material-specific surface treatment of restorations made of glass and hybrid ceramics (VITA SUPRINITY and VITA ENAMIC)
• Available for intraoral (clinical) and extraoral (technical) use

Benefits?
• high-gloss, homogeneous surfaces thanks to a wide range of instruments with exact concentricity and matched grain size
• time-saving and simple handling through efficient materials without the use of polishing paste
• safe clinical use thanks to autoclavable clinical polishing instruments
• gentle and careful processing thanks to abrasive particles and grain sizes matched to the specific materials

What for?
• two-stage VITA ENAMIC or VITA SUPRINITY polishing systems for efficient pre- and high-gloss polishing of glass and hybrid ceramics

VITA bonding solutions – for reliable bonding of all VITA materials, thanks to components ideally matched to the specific materials.
VITA ADIVA® LUTING SOLUTIONS

For material-specific and process-reliable bonding.

FACTS & FEATURES

What?
• VITA ADIVA LUTING SOLUTIONS are fully-adhesive, self-adhesive and temporary bonding solutions perfectly matched with VITA materials*

Benefits?
• reliable bonding of various materials through bonding agents matched with the specific materials
• reliable application in practice thanks to a set with systematically arranged and color-coded components
• efficient in daily use thanks to the handy, two-piece set in the standard tray with all necessary components

What for?
• for bonding of all indirect restorations made of feldspar, glass and hybrid ceramics, zirconia, composite and metal

*) VITA ADIVA is also suitable for restorative materials of other manufacturers.
› BASIC INFORMATION/SPECIFICATIONS

› Product description

VITA ADIVA FULL-ADHESIVE
- fully-adhesive bonding system with perfectly matched components for conditioning tooth substance and restorative material

VITA ADIVA SELF-ADHESIVE
- self-adhesive bonding system with perfectly matched components for conditioning the restorative material

VITA ADIVA IMPLANT ABUTMENT
- VITA ADIVA IA-CEM is a highly opaque luting composite for bonding crowns on titanium bases, individual titanium abutments and severely discolored preparations.

VITA ADIVA TEMPORARY
- dual-curing composite cement for temporary bonding; VITA ADIVA TE-CEM is available in the Translucent shade.

VITA ADIVA COMPONENTS
- microbrush, mixing trays, T-mixer for VITA ADIVA F-CEM, S-CEM, IA-CEM, TE-CEM

Note: VITA ADIVA CERA-ETCH is available as 3 ml syringe and 6 ml bottle. VITA ADIVA is currently not available in the U.S.
PRODUCTS/ASSORTMENTS/COMPONENTS

VITA ADIVA® FULL-ADHESIVE
Full-adhesive bonding solutions
- Conditioning the tooth
  VITA ADIVA® TOOTH-ETCH
  37% phosphoric acid
- Bonding
  VITA ADIVA® F-CEM
  Full-adhesive luting composite
- VITA ADIVA® S-CEM
  Self-adhesive luting composite
- VITA ADIVA® IA-CEM
  Luting composite for implant prosthetics

VITA ADIVA® SELF-ADHESIVE
Self-adhesive bonding solutions
- Conditioning
  VITA ADIVA® CERA-ETCH
  5% hydrofluoric acid
- Bonding
  VITA ADIVA® OXY-PREVENT
  Oxygen protection gel/try-in paste

VITA ADIVA® LUTING SOLUTIONS portfolio
- Conditioning the tooth
  VITA ADIVA® TOOTH-ETCH
  37% phosphoric acid
- Bonding
  VITA ADIVA® F-CEM
  Full-adhesive luting composite
  VITA ADIVA® S-CEM
  Self-adhesive luting composite
  VITA ADIVA® IA-CEM
  Luting composite for implant prosthetics

VITA ADIVA® IMPLANT & TEMPORARY
- Bonding
  VITA ADIVA® TE-CEM
  Temporary luting composite

### Silicate ceramics

Glass ionomers: not possible

Adhesive materials: VITA ADIVA F-CEM, VITA ADIVA IA-CEM, ultra-opaque (VITA Zahnfabrik), Variolink Esthetic (Ivoclar Vivadent), Multilink Automix (Ivoclar Vivadent), Vitique (DMG), NX3 (KerrHawe), Calibra Ceram (Dentsply Sirona), RelyX Ultimate (3M ESPE), Bifix QM (VOCO), PANAVIA V5 (Kuraray Noritake), DuoCem (Coltène/Whaledent)

Self-adhesive materials: VITA ADIVA S-CEM (VITA Zahnfabrik), RelyX Unicem 2 (3M ESPE)

### Hybrid ceramic

Glass ionomers: not possible

Adhesive materials: VITA ADIVA F-CEM, VITA ADIVA IA-CEM, ultra-opaque (VITA Zahnfabrik), Variolink Esthetic (Ivoclar Vivadent), Vitique (DMG), NX3 (KerrHawe), Calibra (Dentsply Sirona), RelyX Ultimate (3M ESPE), Bifix QM (VOCO), PANAVIA V5 (Kuraray), DuoCem (Coltène/Whaledent)

Self-adhesive materials: VITA ADIVA S-CEM (VITA Zahnfabrik), RelyX Unicem 2 (3M ESPE)

### Zirconia-reinforced lithium silicate ceramic

Glass ionomers: Ketac Cem (3M ESPE); Vivaglass CEM (Ivoclar Vivadent), FujiCem (GC Dental)

Adhesive materials: VITA ADIVA F-CEM, VITA ADIVA IA-CEM, ultra-opaque (VITA Zahnfabrik), Variolink Esthetic (Ivoclar Vivadent), Vitique (DMG), NX3 (KerrHawe), Calibra Ceram (Dentsply Sirona), RelyX Ultimate (3M ESPE), Bifix QM (VOCO), PANAVIA V5 (Kuraray), DuoCem (Coltène/Whaledent)

Self-adhesive materials: VITA ADIVA S-CEM (VITA Zahnfabrik), RelyX Unicem 2 (3M ESPE)

### Zirconia

Glass ionomers: Ketac Cem (3M ESPE), Vivaglass CEM (Ivoclar Vivadent), GC Fuji I (GC Dental)

Adhesive materials: VITA ADIVA F-CEM, VITA ADIVA IA-CEM, ultra-opaque (VITA Zahnfabrik), Multilink Automix (Ivoclar Vivadent), PANAVIA V5 (Kuraray)

Self-adhesive materials: VITA ADIVA S-CEM (VITA Zahnfabrik), RelyX Unicem 2 (3M ESPE)

### Please note:

1) In the case of silicate ceramics and hybrid ceramics, self-adhesive bonding composites may only be used for crowns.
2) Conventional bonding materials (e.g., Ketac CEM, 3M ESPE; Vivaglass CEM, Ivoclar Vivadent; GC Fuji I, GC Dental) may be used exclusively for crowns on natural teeth. The preparation requires retentive surfaces for conventional cementation, and according to the preparation guidelines, the anatomical shape must be reduced while adhering to the specified minimum layer thicknesses. With conventional bonding, the bond is almost exclusively achieved by static friction between the bonding material and the restoration, and between the bonding material and the preparation. To achieve the required static friction, a retentive preparation with a preparation angle of approx. 4 – 6°, and the application of VITA ADIVA CERA-ETCH to the respective ceramic surfaces (for 20 seconds) is required.
3) Oxide ceramics cannot be etched using hydrofluoric acid gel and must be sandblasted with Al₂O₃ (50 μm) at a maximum pressure of 2 bar, prior to bonding to increase the retention. The phosphate monomer contained in the composites or primers will create a chemical bond between the sandblasted oxide ceramic surface and the composite. Adhesive bonding is recommended for short stumps (≤ 4 mm).

1. Recommended* 2. Possible 3. Not possible

1) The abutments must be designed in a way to meet the requirements for ceramic-specific preparation and to observe the minimum wall thickness of crowns. Please also observe the manufacturers’ working instructions.
2) Molars only.
3) No more than two adjacent pontics.
4) Exclusively for veneer structures made from VITABLOCS Mark II/TriLuxe forte for the VITA Rapid Layer Technology.

---

*) Note: These are recommended indications; normally, a more comprehensive range of restorations can be fabricated. For details, please refer to the respective working instructions of the products.

**) VITA YZ ST reconstructions are limited in Canada to a max. of six units with a max. of two connected intermediate pontics.
