Furnace

VITA VACUMAT® 6100 M

Reliable firing for all common ceramics.

The **VITA VACUMAT 6100 M** makes fully automatic, microprocessor-controlled firing possible and offers maximum firing quality, user safety and convenience – for all dental ceramics. This reliable furnace features impressive high quality and esthetics.

Thanks to its optimum ergonomic design, the furnace takes up a minimum amount of space, despite its large firing chamber. The linear cooling function ensures greater safety in the firing process. Innovative firing technology and high-tech materials inside the firing chamber ensure even better homogenous heat distribution. A durable investment ring – made in Germany – and reliable electronics promise consistently excellent firing results. Two integrated cooling trays support the safe storage of fired objects.

The VITA vPad control element is required to operate the furnaces.

Fields of application:

The VITA VACUMAT 6100 M is suitable for firing temperatures of up to 1,200 °C, due to its pre-programmed firing programs for:

- Ceramic, stain and corrective firing
- Glaze firing
- Crystallization firing with and without a vacuum

The advantages.

Modern technology

Innovative firing technology and high-tech components for homogenous heat distribution.

Durability

Durable firing muffle – made in Germany – and reliable electronics for consistently excellent firing results.

Efficiency

A wide variety of monitoring and service programs for maximum working convenience, safety and time savings.
