Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation
- **Material of gloves**
e.g. Dermatril P, KCL Nr. 743
Nitrile rubber, NBR
The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.
- **Penetration time of glove material**
e.g. KCL Dermatril P 30 min
The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.
