Product description

- What?**
- VITA ADIVA IA-CEM is an ultra opaque, strongly-masking, dual-curing luting composite for implant prosthetics.
- What for?**
- It is used for permanent adhesive bonding of (abutment) crowns and mesostructures on adhesive titanium bases and individual titanium and zirconia abutments.
- With what?**
- There are material-specific, matched bonding agents for the luting composite to ensure durable bonding of the restoration and the abutment.

PRODUCT BENEFITS

Reliable masking

- Reliable masking of titanium abutments, thanks to ultra opaque, tooth-colored luting composite.

Wide range of applications

- The only ultra opaque luting composite suitable for intra- and extraoral use.

Safe adhesive bond

- Durable bond, thanks to high adhesion values to titanium and (hybrid) ceramic restorative materials.

Efficient luting

- Material consumption is approx. 30 % lower than for conventional mixing tips, thanks to the automix syringe with a short mixing tip*.

Time-efficient treatment

- The luting material ensures time-efficient treatment, since self curing is completed extraorally after 7 minutes and intraorally after 4 minutes.

PRODUCT USE

- VITA ADIVA IA-CEM offers universal and reliable use for bonding of all restorations made of feldspar, glass and hybrid ceramics, zirconia and composite.

VITA ADIVA® IA-CEM SET Prod. No. FAIACEMSET

Designation	Quantity	Available as	Prod. No.***
VITA ADIVA IA-CEM, shade: ultra opaque	5 ml	Syringe + 15 T-Mixers 1:1, brown	FAIACEMU05
VITA ADIVA CERA-ETCH	6 ml	Bottle	FACE6
VITA ADIVA C-PRIME	5 ml	Bottle	FACP5
VITA ADIVA ZR-PRIME	5 ml	Bottle	FAZRP5
VITA ADIVA IA-CEM ACCESSORIES: VITA ADIVA T-Mixer, VITA ADIVA Microbrush, VITA ADIVA mixing trays			

VITA ADIVA® IA-CEM ACCESSORIES

Designation	Units	Prod. No.***
VITA ADIVA T-Mixer 1:1	15 pieces	FATM11
VITA ADIVA Microbrush	25 pieces	FAMB25
VITA ADIVA mixing trays	25 pieces	FAAT25
